WORK EXPERIENCE

Full Stack Engineer Freelancer
Upwork

01/2019 – Present   *Remote*

- Freelance developer on Upwork offering a range of services in backend and frontend development, web development, and more.
- Expertise in JavaScript/TypeScript, database management, external API integration, testing, optimization, and other development-related technologies.
- Dedicated to delivering high-quality results, ensuring client satisfaction, and available for collaboration on your project. Hire me on Upwork: https://www.upwork.com/freelancers/ahmedraazaa/.

Full Stack Engineer
Moment House (https://moment.co)

10/2021 – 05/2023   *Remote*

- Contributed to Moment's Checkout-SDK, implementing a seamless checkout process with event, merchant, and bundle stores, cart management, and checkout summary functionalities.
- Developed modules for events management, profile management, user preferences, Patreon integration, payment methods integration (PayPal and Stripe), and user banning/muting to enhance functionality and user experience.
- Proficient in Next.js, Redis, Node.js, React.js, and PostgreSQL.

Senior Backend Engineer
AiRecruiter

08/2021 – 01/2022

- Implemented advanced automation techniques using Node.js, AWS Lambda, Serverless framework, and DynamoDB to revolutionize the recruitment process for HR professionals at AIRecruiter.
- Spearheaded the development of a cutting-edge platform that streamlined and optimized various stages of recruitment, empowering HR professionals to make data-driven decisions and improving the quality of hires.
- Leveraged expertise in Node.js, AWS Lambda, Serverless framework, and DynamoDB to create a robust and efficient platform that exceeded client expectations, contributing to the success and positive impact of AIRecruiter in the HR industry.

💼 WORK EXPERIENCE

Senior Back-End Developer
Amazon (https://amazon.com)

01/2021 – 04/2021   *Remote*

- Worked on Amazoncompass, a comprehensive project management tool at Amazon, streamlining tasks, team collaboration, QA strategies, surveys, and survey results.
- Implemented messaging queues to automate email delivery for survey reports, enhancing efficiency and communication with stakeholders.
- Leveraged skills in AWS SQS, React, AWS Lambda, Express.js, and Node.js to optimize project workflows and collaboration within the organization.

Full Stack Engineer
Warner Brother Technologies

05/2019 – 04/2021

- Developed WBPOP, an e-commerce platform connecting merchants with newly released series, enhancing the shopping experience.
- Played a crucial role in building SIMS, a Social Influencer Management System, maximizing product visibility through effective social campaigns.
- Created the Status App, optimizing ticket management by monitoring open, closed, and in-progress tickets across multiple applications.

Senior Full-Stack Developer
Makeen Technologies (https://makeen.io)

01/2019 – 04/2021   *Remote*

- Developed Vyoo App, a social media platform for professionals, enabling event notifications, chats, and friend connections.
- Revolutionized the nursing industry with HolliBlu, offering innovative solutions for nurses and healthcare companies.
- Created Finch, a unified integration system for secure access to organizational data across multiple HRIS and payroll systems.
- Proficient in Angular, Next.js, Redis, Node.js, React.js, and PostgreSQL.

Product Back-End Lead
ONSTAK (https://onstak.com)

12/2017 – 12/2018   *Lahore, Pakistan*

- Developed a real-time monitoring platform for multiple AI sensors, ensuring continuous tracking and transmission of sensor updates to an application dashboard.
- Implemented socket communication protocol for seamless and efficient data exchange between sensors and the application, enabling immediate detection and relay of changes in sensor states.
- Designed an application dashboard to present sensor data in a visually appealing and user-friendly manner, allowing users to monitor AI sensor performance and behavior in real-time.

Software Engineer
ITBOOST

11/2016 – 12/2017

- Contributed to the development of TBOOST, a dynamic documentation platform for MSPs, revolutionizing the management and organization of employee documentation in the US market.
- Designed and implemented core modules, playing a vital role in building the platform from scratch and ensuring a successful product launch.
- Utilized cutting-edge technologies like Angular, Node.js, and MongoDB to develop and integrate various features, delivering seamless and intuitive user experiences and contributing to the platform's growth and impact in the industry.
